Data analyst and MCA student with a BCA foundation in computer applications. I work with Excel, SQL, Python, and Power BI to clean data, build reports, and present findings clearly. My projects span a responsive brand website and a database-backed gym management system, giving me practice on both the analysis and interface side of a problem.

TECHNICAL SKILLS

Data analysis	Excel (PivotTables, formulas) · SQL (joins, aggregations) · Python (pandas, Jupyter) · Power BI (DAX, dashboards)
Databases	SQL Server · relational schema design · stored procedures
Web	HTML5 · CSS3 · JavaScript · React · Vite
Systems & tools	C# · ASP.NET MVC · Git · GitHub · VS Code · Visual Studio

SELECTED PROJECTS

Live
React + Vite
2025

Ultraceutics India

Responsive brand website · ultraceutics-mvp.vercel.app

- Built a responsive, editorial website for a wellness and aesthetics brand, focused on service discovery and a calm visual hierarchy.
- Implemented mobile-first layouts and reusable components in React and Vite, with clear navigation and content structure.

Academic
ASP.NET MVC
C# · SQL Server
Jan–May 2025

Gym Management System

Database-backed management web app · github.com/sourabhk-tech/GymManagementSystem

- Designed a normalized SQL Server schema for members, memberships, payments, and trainers, with referential integrity and indexed queries.
- Built member registration, admin authentication, records management, and role-based access in ASP.NET MVC.
- Wrote SQL queries and stored procedures to support member records, membership tracking, and payment reporting.

EDUCATION

MCA — D Y Patil University

Ambi, Pune · 2025–2027 (pursuing)

BCA — Vivekanand College

Kolhapur · 2022–2025

CERTIFICATION

Deloitte Data Analytics Job Simulation

Deloitte · Forage · October 2025

Hands-on simulation covering data cleaning, analysis, and business reporting.
